

ISTN212 Assignment Peer Evaluation Form

Group Name	
Fuzzy Logic	
System Description	Student Management System

No	Group Member's Student Number	Group Member's Name & Surname	% Estimated Contribution to M1	Comment	Signature
<u>1</u>	218023210	Talha Vawda	40%	Expected to do everything by everyone and did most of the work but still got accused of not doing much	<i>T Vawda</i>
<u>2</u>	218008477	Luqmaan Haffejee	20%	Did second most contribution and gave me a lift but expected me to do everything	<i>L Haffejee</i>
<u>3</u>	218006491	Azhar Mohamed	25%	Made him do most of the entries in SQL so he deserves some credit	<i>A Mohamed</i>
<u>4</u>	218029400	Ahmad Jawaad Shah	15%	More concerned about his Math tutorial than the project	<i>AJ Shah</i>

Total 100%

The estimated individual contribution column will reflect an intuitive assessment that is made holistically by the entire group for each group member. This assessment should be a consensus based value where the entire group agrees on the amount of effort that individual group members have made in order to ensure the success of the project.

In most cases, where the group has worked as a well organised team, this assessment value will reflect equal values for all group members. However, in cases of exception where some group members may have contributed more/less than other group members, then this should be appropriately reflected. **The percentage sum of the individual contributions must add up to 100.**
